New bridge over Storstrøm. Deletion of note regarding construction of the bridge.

Details:

Delete the following note:

NY STORSTRØMSBRO

En ny Storstrømsbro er under opførelse NW for den

eksisterende Storstrømsbro.

For at beskytte anlægsaktiviteterne er arbejdsområder

etableret. Arbejdsområderne justeres i takt med, at opførelsen

af broen skrider frem. I arbejdsområderne er der forbud mod

uvedkommende sejlads, dykning, ankring, fiskeri og arbejder på

havbunden. Der er etableret sejlrender, som leder skibene i

mellem arbejdsområderne. Sejlrendernes placering justeres i

takt med, at opførelsen af broen skrider frem.

Continued on the next page

Skibsfarten kan finde oplysninger om arbejdsområdernes og sejlrendernes aktuelle placering og afmærkning i Efterretninger for Søfarende (EfS). Ændringer i placering og afmærkning vil blive varslet med efterretninger (P-meddelelser) i EfS.
Broens tracé, arbejdsområderne og sejlrenderne er vist i kortet. Geodatastyrelsen vil justere placering og afmærkning i kortet i overensstemmelse med efterretningerne i EfS. Skibsfarten skal dog være opmærksom på, at der kan forekomme forsinkelser fra justeringer af placering og afmærkning offentliggøres i EfS til justeringerne er tilgængelige som kortudsnit i publikationen Søkortrettelser.

NEW BRIDGE OVER STORSTRØM
A new bridge is under construction NW of the existing bridge over Storstrøm.
To protect the construction activities, marked work areas have been established. The work areas are adjusted as the construction of the bridge progresses. In the work areas unauthorized sailing, diving, anchoring, fishing and work on the bottom are prohibited. Channels have been established to guide the ships between the work areas. The location of the channels is adjusted as the construction of the bridge progresses.
Mariners can find information about the current location and marking of the work areas and channels in the Danish Notices for Mariners (Efterretninger for Søfarende - EfS). Changes in location and marking will be published with notices (P-notices) in EfS.
The route of the bridge, the work areas and channels are shown in the chart. The Geodata Agency will adjust the location and marking in the chart in accordance with the notices in EfS. However, mariners must be aware that there may be delays from the time adjustments to location and marking are published in EfS until the adjustments are available as block in the publication Danish Chart Corrections.
